PROFESSIONAL SUMMARY

Full-Stack Developer with **2 years** of experience at a healthcare startup, building production-grade applications using **React, TypeScript, Node.js, and MongoDB**. Experienced in **microservices architecture** (gRPC, Temporal), **cloud integrations** (AWS, GCP), and end-to-end delivery of scalable distributed systems. Skilled in **GenAI integrations** and real-time features using Agora, Socket.io, and LLM-powered workflows.

EDUCATION

National Institute of Technology, Hamirpur
B.Tech in Electronics and Communication Engineering (ECE)

2020 – 2024
CGPA: 8.01/10

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL

Frontend: React.js, Remix.js, Next.js, Tailwind CSS, Material UI, Bootstrap

Backend: NestJS, Node.js, Express.js, REST APIs, GraphQL, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, Redis

Tools & DevOps: Git, GitHub, Docker, CI/CD, Swagger, Postman, Jest

Systems & Concepts: Microservices, System Design, Data Structures & Algorithms, OOPs, DBMS, Agile/Scrum

EXPERIENCE

Unify Technologies

Full Stack Developer

Hyderabad
Feb 2025 – Present

- Architected and delivered **full-stack modules end-to-end**, owning schema design, **NestJS REST APIs**, and frontend implementation (**React, TypeScript, Tailwind CSS**).
- Built high-quality, scalable UI workflows with dynamic state management, responsive layouts, and optimized rendering, reducing average **page load time by 35%**.
- Implemented **multi-provider payment integration (Stripe, Razorpay)**, enabling secure transactions, flexible configurations, and streamlined payment workflows across **3 product lines**.
- Independently delivered features including file upload systems, **AI-powered workflows**, third-party service integrations, and admin configuration modules with full test coverage.
- Integrated **LLM APIs (OpenAI/Gemini)** to power document summarization, intelligent auto-fill, and conversational assistants; built AI-powered workflows using **Temporal** for automated inference pipelines and semantic search.

Civil Guruji

Full Stack Developer Intern

Remote
June 2024 – December 2024

- Engineered end-to-end user authentication (login, signup, password reset) using **React.js and Express.js** with **JWT-based session handling**, improving security compliance and user experience.
- Implemented subscription plan management and customer review workflows, driving a **30% increase** in overall platform participation within 3 months of launch.
- Built responsive job listing and application components using **React.js and REST APIs**, reducing candidate submission time by **25%** through streamlined UX flows.

PROJECTS

MindCare AI – AI-Powered Behavioral Health Platform – TypeScript, React.js, Next.js, Supabase, RBAC

neuralforge.in

- Built a **multi-tenant** AI-powered health platform using **Next.js and Supabase** with **role-based access control (RBAC)** supporting user, admin, and superadmin roles across subdomain-isolated organizations.
- Developed **RESTful API routes** for authentication, patient intake, appointment booking, and admin analytics with session-based security, cookie management, and **Row-Level Security (RLS)** on PostgreSQL.
- Integrated a **conversational AI intake assessment** with real-time mood tracking dashboard, doctor directory with specialty filtering, and appointment scheduling with cancellation workflows.

Chat App + Real-Time Code Editor – React.js, Node.js, Express.js, Socket.io, WebSockets, MongoDB

- Built a **real-time chat application** using **Socket.io and WebSockets**, enabling users to send text, images, and videos with **sub-100ms latency**.
- Implemented **Node.js and Express.js** REST API backend with **JWT-based** secure user authentication.
- Developed a fully responsive UI with **React.js and Tailwind CSS**, contributing to a **40% increase** in average session duration and a **20% improvement** in user retention.

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming:** Solved **600+ LeetCode problems**, top **15% globally**. Active on Codeforces and CodeChef.
- NodeJS – The Complete Guide (Udemy):** MVC architecture, REST APIs, GraphQL, authentication.
- Mastering Data Structures & Algorithms (C/C++)** – advanced problem-solving and optimization.
